

To ALL my lovely kids in P5,

It is my great pleasure to teach you all again this year, both English General Studies. Do you remember what I told you last year about your learning? This year, I can see you further improve in your study as well as the attitude towards others. These make me quite impressed.

The boys in my English group are still active (but luckily not naughty anymore). You all still want to get my attention in the lesson. Some of you even play with me during your break time. I enjoy the moment with you a lot.

Girls, same as last year, you keep doing well in-class. You are always very attentive and patient in class. What's more, you are always doing your best to achieve the best. Keep up with this good learning attitude along your learning journey.

Last, for my class 5C, though I do not teach you any subject this year, I know you very well as I have taught most of you in the past few years. All of you are talkative and would like to share with me your thoughts in your mind. That is really lovely.

Dear all boys and girls in P5, you are all energetic. Keep up with all your good work and I am sure success will be ahead of you.

All the best,
Mr Cheng
June 2024
